

단계1: EC2 Instance > Terminate

The screenshot displays the AWS Management Console interface for the EC2 service. The top navigation bar includes the AWS logo, a 'Services' menu, a search bar, and a list of services like IAM, EC2, VPC, Lambda, API Gateway, S3, EMR, CloudFormation, Elastic Container Service, and CodePipeline. The left sidebar shows the 'Instances' menu item highlighted with a red box. The main content area shows the 'Instances (1/1)' page with a table of instances. The table has columns for 'Name', 'Instance ID', and 'Instance state'. The instance 'hello-ec2' with ID 'i-0e0a30e99c1f7e3a4' is in the 'Running' state. The 'Actions' dropdown menu is open, showing options like 'Stop instance', 'Start instance', 'Reboot instance', 'Hibernate instance', and 'Terminate instance'. The 'Terminate instance' option is highlighted with a blue box. A red arrow points from the 'Instances' menu item to the 'hello-ec2' instance, and another red arrow points from the 'hello-ec2' instance to the 'Terminate instance' option.

Instances (1/1) Info

Find Instance by attribute or tag (case-sensitive)

<input checked="" type="checkbox"/>	Name	Instance ID	Instance state
<input checked="" type="checkbox"/>	hello-ec2	i-0e0a30e99c1f7e3a4	Running

Actions

- Stop instance
- Start instance
- Reboot instance
- Hibernate instance
- Terminate instance

i-0e0a30e99c1f7e3a4 (hello-ec2)

Terminate instance?

On an EBS-backed instance, the default action is for the root EBS volume to be deleted when the instance is terminated. Storage on any local drives will be lost.

Are you sure you want to terminate these instances?

Instance ID	Termination protection
 i-Oe0a30e99c1f7e3a4 (hello-ec2)	 Disabled

To confirm that you want to terminate the instances, choose the terminate button below. Instances with termination protection enabled will not be terminated. Terminating the instance cannot be undone.
